

City Lights

Blindside

I took a walk down the 4th avenue when i saw it
This red line in the grey concrete
Leading somewhere out of sight
Something compelled me to stop
So I jumped over the fence and
Started following what appeared to be
The trail of a leaking tin can
Leading away from the light
Is this what needs to be done
Blacklight shining in the dark
Brings out the brightness more than in the sun
Trade love for the city lights
Tonight you chose me to stay
Trade light for the city love
Tonight you chose me to stay
So what if i continue this walk
The red line is taking me down
Trashcan lonely street, yeah
The streets have their names but how come this people doesn't love just for fun
I'm starting to smell something beautiful
Though these streets are rotten
And now is this what needs to be done
Blacklight shining in the dark
Brings out the brightness more than in the sun
Trade love for the city lights
Tonight you chose me to stay
Trade light for the city love
Tonight you chose me to stay
