World Sick

Broken Social Scene

We got a minefield of crippled affection
All for the borrowed mirror connection
That's why I'm leaving this spoken protection
I'm a romance addict so that I can confess thatI get world sick every time I take a step
I get world sick, my love is for my landWe got a lady who's wanting to dance
Men with the maybe looking for endingsI get world sick every time I take a step
Yeah, I get world sick, my love is for my landI'm sick of the self-love, losing the bless me
The exit, the roof of the rule of what we'll be
And all the destroyers who never wore dresses
They live for the older, well, I'll confess thisI get world sick every time I take a step
Yeah, I get world sick, my love is for my land
I get world sick every time I take a step
Yeah, I get world sick, my love is for my land
