

No Surrender

Sacred Sorrow

It's like I just woke up
Another nightmare
Saying all you want
While our lips are sewn shut

How could you shut our mouths
How can I set this ghost free
how could smother
Our spirituality

We will not remain low
This is our faith, our lives
Our God is beautiful
Proves his love
Through sacrifice

We are who we are
Take it or leave it

Never has the burning
Of a white flag
Felt so justified

We will not bow down
We will not hold back
Strike us with your fists
We're not complacent

Throw us in your fire
God will deliver us
And deliver you

We won't back down
