

# Smell the Roses

Natasha Bedingfield

I've been livin in a room without windows  
Away from the sun, no oxygen  
I couldn't tell if it was day or night  
Away from the sun, growing nowhere fast  
Rushing along on the pavement  
Don't even look at the people's faces, going places  
When an old man said stop  
You nearly stepped on a flower  
Growing through the cracks  
And you didn't even notice  
Chorus:  
Wake up smell the roses  
Life is happening and you don't know it  
Wake up, take a moment  
Grab it in your hands... and own it  
I realise our love is like that flower  
Been neglecting the thing most precious to me  
You've been talking but I haven't been listening  
The static in the noise been drowning you out  
I so wanna be in the future  
That I keep tripping  
Over my own shoe laces  
In these human races  
And i'm brought back to now  
And the volume goes down  
There's peace in his words as loud as a shout sayin'  
[Chorus] He says [Chorus] Like your birthday I forgot  
I was with you  
But I was not... really there  
Snap your fingers, that's your life  
Not gonna let it pass my by no  
When an old man said stop  
You nearly stepped on a flower  
Growing  
Through the cracks  
And you didn't even notice [Chorus]
