

Let Go

I Know Leopard

Too much pressure, too much pressuring
So much oxygen but you won't let it in
Tunnel vision seems to keep out the light
But that won't help you see any better tonight

My simplicity, my indifference
Your white-knuckled grip on your opinion
Now you can't see through it
'Cause you lost sight of the beauty
That kept you alive

[Chorus]
If you let go
If you let it all out baby
It'll come back to you

Now darling if you let go
If you let it for a second
Maybe I can catch up to you

Too invested in your intelligence
In and out of love with everything
Money trees lose leaves in the wind
You tear limb from limb to get it

[Chorus] x 2

Too much pressure, too much pressuring
So much oxygen but you won't let it in
