

# Natural

## S Club 7

Loving you is not  
Just luck or illusion  
It's in the make-up of our DNA  
It's not by chance  
We make the perfect solution  
Don't fight it baby  
You know that it's just destiny's way  
Baby lovin' you  
Comes easily to me  
It's what I'm livin' for  
It's all in the chemistry  
Baby lovin' you  
Is how it's meant to be  
It's something that is  
Oh so natural to me  
Natural, oh baby, baby  
We got the answers  
But there's no explanation  
We got each other baby  
Come what may  
It's in the science  
It's genetically proven  
'Cos when you touch me  
The reaction it just blows me away  
Baby lovin' you  
Comes easily to me  
It's what I'm livin' for  
It's all in the chemistry  
Baby lovin' you  
Is how it's meant to be  
It's something that is  
Oh so natural to me  
  
Natural, oh baby, baby  
Turn off the light  
Lay your head next to mine  
Take it slowly  
A step at a time  
C'mon get close, closer to me

It's oh so natural  
It's oh so easy to see  
Baby lovin' you  
Comes easily to me  
It's what I'm livin' for  
It's all in the chemistry  
Baby lovin' you  
Is how it's meant to be  
It's something that is  
Oh so natural to me  
Baby lovin' you  
Comes easily to me  
It's what I'm livin' for  
It's all in the chemistry  
Baby lovin' you  
Is how it's meant to be  
It's something that is  
Oh so natural to me  
Baby lovin' you  
Comes easily to me  
It's what I'm livin' for  
It's all in the chemistry  
Baby lovin' you  
Is how it's meant to be  
It's something that is  
Oh so natural to me
