What If We Never?

Kristin Chenoweth

Here with you, here with me, life is so beautiful
Close my eyes, try to see how it might have been
Had we not ever met
One twist of fate, one look too late
What if we never met on that corner
What if that chance had just passed us by
What if we kept walking
And never walked into each other' eyes, each others eyes
What if that light changed
What if we turned away
What if we never turn around
Where would we be now?
One day you're on your own and everything's the same
Then you're soul finds the soul that seems to know your name
Nothing will be the same
One point in time, two hearts collide
What if we never met on that corner
What if that chance had just passed us by
What if we kept walking
And never walked into each others eyes, each others eyes
What if that light changed
What if we turned away
What if we never turn around
Where would we be now?
Could have overlooked you
Might have looked right through you
And let the moment slip away
And never seen your face
What if we never met on that corner
What if that chance had just passed us by
What if we kept walking
And never walked into each others eyes, each others eyes
What if that light changed
What if we turned away
What if we never turn around
Where would we be now?
What if we never turn around
Where would we be now?
