

Mars

Fun Lovin' Criminals

Where the party at?

Mars

Where the girlies at?

Mars

If the party's at

Mars

Then get your ass to Mars

Yo space is the place Stephen Hawking say

And I think that the man's ok

Yeah you all done up on the big red planet up yonder

You get fonder and fonder

Girls, parties, other things yeah

Oh what the universe brings

Say oh what the universe brings

Now where the party at?

Mars

Yo out in space you may implode

So stay inside my disco dome

I'll be there 10ish with Branson

Changin' the world with random tandem

Hold my hand I take you space craft

Dance you past them stars we fly past

Crazy thing this interstellar

Grab your girl or grab a fella
