Experiment No. 6

Lemon Jelly

0:09
500 milligram dose administered
Experiment begins0:59
Temperature 98.6
Pulse 68
Blood pressure 120/70
Breathing regular
Focus clear1:41
Pulse 110
Blood pressure 140/90
Sweat glands aroused
Slight constriction of pupils
Inducing stage 22:25
Temperature 98 degrees
Increasing dilation of pupils
Delta waves moving from cranial anterior to posterior
Overwhelming sense of well being and euphoria2:49
Increasing input voltage to maximum3:37
Temperature rising to 106.2
Pulse 160, blood pressure 190/120
Displaying symptoms of disorientation
Profuse sweating, extreme dilation of pupils
Inducing stage 34:34
Core temperature drop to 93 degrees
Pulse down to 34
Blood pressure 60/40 and falling
Eye lids flickering5:17
Pulse and temperature continuing to fall
Body inert, skin gray and flaccid
No response to external stimulae
EEG shows no cerebral activity5:42
Experiment ends
