

Green Lights

[Sarah Jarosz](#)

I hear your voice out in the darkness
Somewhere across the fresh-cut lawn
We're running barefoot through the wet grass
Nowhere to be until the dawn(La-da-da...)Up overhead the stars are burning
Gravity's bending time and space
The galaxies are slowly turning
And we're both standing face to face
Green lights and open road
The skies of endless blue
That's the feeling I get with you(Ah-ah-ah...)And all the corners of the universe
That light could fall to
I'm standing next to you
Green lights and open road
The skies of endless blue
That's the feeling I get with you
(Repeat)I hear your voice out in the darkness
