Where Rockets Fly

S.P.O.C.K

Strange days indeed
different lies, different whys
Strange days indeed
different views, different newsThere once was a time
when the future was bright
and dreams of the world
were cosmopolite
Where only rockets fly
into the great wide open sky
reaching to the highest high
you're not alone
Those were the days
neon light, black & white
Those were the days
No gravity, no miseryBut now it's not too late
no need to loose the faith
The world is here for you
Let's change it to something new
Where only rockets fly
into the great wide open sky
reaching to the highest high
you're not alone
