With Triumph Comes Loss

Cataract

Humanity is covered by the veil of suffocation compassionated world is set on fire the leaders rule with no regret dead bodies have formed the absolute the foundation of oppression they have been given is the result of nations history has driven this engulfed world we have to set free this crippled bodies we have to heal Most western civilisations often take their social and economical structures as the basic platform for a healthy society. Without considering the cultural and social evolution, they try to stamp their own meaning of life onto other civilisations in the meaning of being the only "right" solution for all their problems. We have to fight this triumph of loss.
