

# Me and Maxine

Sammy Kershaw

I used to kiss Maxine through the front door screen  
    Standin' on her mama's steps  
And if her daddy hadn't come along and run me off  
I know I'd have never left It's a cryin' shame but that's they way it was  
    Somethin' always there to separate us Well, I tried not to let it show  
    But everyone seemed to know  
There's something between me and Maxine She used to wave at me from across the street  
    Through her bedroom window every night  
    She was almost close enough for me to touch  
But I still couldn't hold her tight That's how it's been right from the start  
    Always somethin' there to keep us apart Well, I tried not to let it show  
    But everyone seemed to know  
    There's something between me and Maxine  
There's something between me and Maxine All the things that came between us  
    Couldn't change a thing  
    Now we're together and that's how we're gonna stay  
'Cause our love just grows a little more with everyday No, I'm never gonna let her go  
    'Cause in my heart I know  
    There's something between  
    Oh, I just wanna hold her close  
'Cause in my heart I know There's something between  
    There's something between  
    There's something between  
Me and Maxine, me and Maxine I know, I know there's somethin'  
    Somethin' between  
    I know, I know there's somethin'  
    Somethin' between me and Maxine  
    Somethin' between me and Maxine
