

# Never Seen Blue (B-side Version)

[Tori Amos](#)

Some boy you are to take me by the hand  
Through an elevator got a little red line  
That tells you, boy where the razor's been You said, "Girl if you think you can turn that violator  
You'll finally be that woman, yes finally be that woman  
That's been frozen in that pretty silver gown" I've never seen blue like the blues he drives  
In and around and through me again, I said  
I've never seen eyes like a blues he drives, in and around  
And through me again, through me again, through me again Some boy you are are to wear my color red  
To wear it very proudly and wear it like a lady  
Knows how to cross her legs where the birdie's been
