

Watch Over Me

Craving Lucy

Too many times I've tried to answer
The voices in my head
Too many nights I see that anger
All of the things I said Can you believe
You're building a fire
It's one that keeps me cold Take me down
And leave me lonely
Who's left to watch over me
Now you're gone
My light is fading
You brought on the darkness in me In me Sometimes I feel the words you whisper
Why can't you hear me scream
To make believe that it doesn't matter
Is harder than it seems Can you believe
You're building a fire
It's one that keeps me cold Oh, the sanctity
That circles me, broken
My soul's been fighting solemnly Take me down
And leave me lonely
Who's left to watch over me
Now you're gone
My light is fading
You brought on the darkness in me Take me down
And leave me lonely
Who's left to watch over me
Now you're gone
My light is fading
You brought on the darkness in me Take me down
And leave me lonely
Who's left to watch over me
Now you're gone
My light is fading
You brought on the darkness in me In me
