

# Still In the Mood

## Deacon Blue

By the light of the waning moon  
Under a blue black sky  
They talked the slow way home  
Of years passed closely by They caught only a casual look  
From strangers with things to do  
Only a loveless heart  
Could feel anything less than sure They're still in the mood, still in the mood  
After the time has passed  
They were still in the mood You'd take the chimes of midnight  
To be the drum of your heart's desire  
And you'd change all your golden rings  
For one time on the wheel of fire Take off your shabby coat  
Let all the leaves fall down  
Leave this stuff till morning  
Then come gently 'round To be still in the mood, still in the mood  
When the sun has come up  
We'll be still in the mood We're still in the mood, still in the mood  
After the time has passed  
We're still in the mood
