

# Multiply and Divide

## The Soviettes

Put the keys to the car  
then they'll know that someone sits inside  
Put a flag on the back  
and they'll see you've got all American pride  
Keep your eyes on the ground  
chemicals, gonna keep you from those lies  
Now you're part of the band  
that they've got get your peas in a pod and you'll  
multiply and divide Will someone when you're sparkling take a right  
belt rub them in the right way? Go! Everybody says when you lose control  
this time they'll never wanna fight 'em Go! Fuel to the fire I fear sometime  
on the pills and these hearts expire Go! I take a shortcut So I end up with too much  
D-I-V-I-D-E Stop! Get your head around me  
you've got to think about it Look! at what's going on around you Learn! How to think things through  
and things that you can do to Fight! They'll divide and multiply Put the keys to the house  
at the end of the circle then you'll see  
that just drop to the plan  
but you know it makes everybody free  
Get up back to the wall to control  
who you'll talk to who you'll see  
You'll be American dream  
how's it feel have you got what you want  
and you'll multiply and divide Go! Straight to the point  
and you're lending your voice  
pretending you're standing up  
for what is right Go Division on the A.M. multiply  
F.M. give it to the best one yet Go and never what you want  
and never what you get  
and straight to the point to the best one Go I'm taking chopped nuts and remember that's  
too much D-I-V-I-D-E Well now that's not exact but the point  
is that rockers know the thieves  
keep hopping the bridge  
but It's not gonna get us what we need  
Now they're waiting in streets  
cause what else can we do  
to make them see  
No insurance no pill  
not the part of the plan  
that you've got that'll multiply and divide multiply and divide

(That's right)multiply and divide  
(multiply and divide)multiply and divide  
(That's right)Multiply and divide  
(yeah)Stop!Get your head around me  
you've got to think about itLook!at what's going on around youLearn!How to think things through  
and things that you can do toFight!They'll divide and multiply
