Fright Night

Stratovarius

Feel the night, conceal your fright It came from your right
Look what you found lying on the ground
Shiny ball you don't know anything at all
Look through yourself theres a mystery full of you
Always condemn though you never understand
Why you resist never knew how to fight
You touch the lightIt's Fright Night
It's Fright NightIn the dark the shining spark Follow this mystery ball
But dont look back theres force of evil so black
Ready to take you away Look through...Look around is this the end you see? Wrapped inside the pain and misery Is it true when you say that you never
would give up Memories fill my mind I can see
childhood againLook I've found my old toys
They bring memries in my head And now we are big boys
and that feeling Is dead and it's goneGlimpse of the childhood appears to me so clear
Tales from Sherwood they fade away disappear
Where am I going I can't see a solution
I'm here alone inthe heart of the darkest nightIt's Fright Night
