Until You Came Along

Golden Smog

Sometimes you're up, sometimes you're down
Don't let your feet ever touch the ground
Or comfort me in times of doubt
See despair or lies and cares and a falling outWith my friends I used to follow
Nearly everybody's daughter

That's until you came alongIn a bar-room patrons singing But I just sat there drinking

That's until you came along Your star-crossed eyes and your troubled mind Seems you were left just for me to find

Sweet lady lay your hands in mine

Upon my face laid to waste by years of wineWith my friends I used to follow Nearly everybody's daughter

> That's until you came alongIn a bar-room patrons singing But I just sat there drinking

That's until you came alongSweet lady lay your hands in mine
Upon my face laid to waste by years of wineWith my friends I used to follow
Nearly everybody's daughter

That's until you came alongIn a bar-room patrons singing But I just sat there drinking

That's until you came alongWith my friends I used to follow Nearly everybody's daughter

That's until you came alongBut the darkness just got darker
This heart of mine got harder
That's until you came along
