Love To The Test

Niki & the Dove

Oh baby baby come along, let's make a start
Let's give them all something to talk about
You wanna settle down, me too you'll see
You wanna make it good? Make that with me
I waited 'til I was more mature, babe
I waited 'til I couldn't wait no more, babe
I waited but I'm knocking on your door now
All because the first time that I saw you
The first time I saw you, I saw you
I thought baby can I hold you, hold you?
What's the time and what's your number, boy?
I can't wait to get to know you, to know you more
The first time I saw you, I saw you
I thought baby can I hold you, hold you?
Touched down, the first time, the first time
Are you ready for this woman, this woman?
I knew it from the start and that's no lie
But when you're born a Gemini, you think twice
I tried to run away, I stopped to catch my breath
Just to find out there were parallel footsteps
The first time I saw you, I saw you
I thought baby can I hold you, hold you?
(There were parallel footsteps)
What's the time and what's your number, boy?
I can't wait to get to know you, to know you more
The first time I saw you, I saw you
I thought baby can I hold you, hold you?
Touched down, the first time, the first time
Are you ready for this woman, this woman?
The first time I saw you, the first time, oh oh
The first time I saw you, oh oh
The first time, oh oh
The first time I saw you, I do
