

Through the Night

Mike Stud

Driving through the night
Looking for you
Baby let me know
I'm spinning out of control
Like a roller coaster
Making me feel some type of way
All of these thoughts I can't explain
Are you saying something? I just can't change
But I've been trying to, I know I'm supposed to do
Everything I said I would
Yeah, usually I'm alone, but now I'm on the road
I ought to know which way to go
Driving through the night
Looking for you, I'm looking for you
And it goes up and down, and it goes round and round
Like a roller coaster
Making me feel some type of way
All of these thoughts I can't explain
I'm still doing my best, I'm on my way
Sipping on this Beam, trying to find a balance
I feel lost without it, I'm okay with being famous if it's for my talents
So I had to get lost to find myself
If I was wrong then I meant well
Is it too late to change our mind, do I take our time, I guess time will tell
I'll take you anywhere
Yeah, where you want to go to girl?
Remember what I told you girl
Better love me for the old dude girl
Because your love got me numb like a drug
Behind this wall I put up, too scared to open it up
But I've been trying to, I know I'm supposed to do
Everything I said I would
Yeah, usually I'm alone, but now I'm on the road
I ought to know which way to go
Driving through the night
Looking for you, I'm looking for you
And it goes up and down, and it goes round and round
Like a roller coaster
Making me feel some type of way
All of these thoughts I can't explain
I'm still doing my best, I'm on my way
