

# Step Out of Hell

## Halloween

Time has come, start your search for tomorrow

No escape from that long trail of sorrow

You don't know how it keeps going on, oh no Wake up out of misty dreams

Evil drugs is starting to grab you, to grab you Step out of Hell, the demon's dancing around your brain

Step out of Hell, the streams of madness flow through your veins

Step out of Hell, go on like this you're gonna be dead

Step out of Hell, and take my hand, I wanna help You did your best to keep yourself down

Give it a rest and just turn around

It's only a one way street of lies, yes it is Living in a twilight zone

Get away out of that drug jungle, well, that drug jungle Step out of Hell, the demon's dancing around your brain

Step out of Hell, the streams of madness flow through your veins

Step out of Hell, go on like this you're gonna be dead

Step out of Hell, and take my hand, I wanna help you, but can I? Another line, have a good time, you don't mind

To turn you brain inside out, to serve the final rite Step out of Hell, the demon's dancing around your brain

Step out of Hell, the streams of madness flow through your veins

Step out of Hell, go on like this you're gonna be dead

Step out of Hell, and take my hand I wanna help you
