

California Plates

[Deric Ruttan](#)

Met ya out on the west coast
fell in love in Frisco and brought you home
you said you loved this small town
we tried to put some roots down of our own But the city lights burned so bright
in your memory
guess they were always calling you
away from me Chorus:
You should be good to go
I topped it off, I checked the oil
there's a map on the dash,
but I guess you know your way And I have to laugh I guess
as you point your Eldorado west
you changed my life
you changed your name
but you never changed your California plates Bet you missed the beaches
warm ocean breezes rollin' in
but I'll miss the cool nights
nothin' but the firelight on your skin Girl dry your eyes I know you tried
to make it work
but in your heart your
still a California girl Chorus:
You should be good to go
I topped it off, I checked the oil
there's a map on the dash,
but I guess you know your way And I have to laugh I guess
as you point your Eldorado west
you changed my life
you changed your name
but you never changed your California plates And I have to laugh I guess
as you point your Eldorado west
you changed my life
you changed your name
but you never changed your California plates
no you never changed your California plates
