Come To Me

Jc Chasez

Traveling the galaxies on telepathic roads
Singing in the distance, clouds of breath out in the cold
All of my desires waiting for someone to hold
So come to me, so come to me, yeah
Lying here, pretending that you're closer than you are
Swear, I heard you whispering, "Would someone break my fall?"
Memories of kisses from the dreams until the dawn
So come to me, so come to me
The nights when you don't call, my life is a catastrophe
I need to feel you close to me, I'm waiting out the storm
'Cause when I'm all alone, I imagine I am face to face
Inhaling every breath you take, I'm waiting out the storm
I'm waiting out the storm
Conversation hotter than a fireman engulfed
Sweeping through my body causing temperatures to smoke
Every second passing makes it hard for me to cope
So come to me, so come to me
Walking with my fingers and I'm creeping down the slow
Reaching for the places that no one could ever go
Pushing me to ecstasy, you touch my very soul
So come to me, so come to me, yeah
Thinking of you, what can I do?
I'm thinking of you
'Cause when I'm all alone
I lie awake and masturbate
I love to hear the sounds you make
Baby, here I come, baby, here I come
Come, come, waiting, waiting
I know, I know, you'll come to me
You'll come to me
So come to me, so come to me
So come to me, so come to me
