

Scared

Three Days Grace

At night I hear it creeping
At night I feel it move
I'll never sleep here anymore I wish you never told me
I wish I never knew
I wake up screaming
It's all because of you So real these voices in my head
When it comes back you won't be
Scared and Lonely
You won't be scared
You won't be scared and lonely
You won't be scared you won't be lonely I think there's something out there
I think I heard it move
I've never felt like this before I wish You never told me
I wish I never knew
I wake up screaming
It's all because of you So real these voices in my head
When it comes back to you won't be
Scared and Lonely
You won't be scared
You won't be scared and lonely
You won't be scared you won't be lonely
