Bootstraps

H2O

I got your bootstraps
I'll pull you up, I won't think twice
I need you to take it as advice
We've got to help each other out'Cause that's what this is all about
And how the fuck can we forget
How we got here today, no wayNow it's a time to make it clear
That we would not have made it here
Without the ones who pulled us up
And taught us how to make it workAnd if you ever get the chance
To change somebody's circumstance
I hope you know what you should do
'Cause that shit will come back to youI got your bootstraps
I'll pull you up, I won't think twice
I need you to take it as advice
We've got to help each other out'Cause this is how we all survive
And we're never gonna stay alive
Without each other there's no way, no way
