Luminous

Stratovarius

Luminous, we shine
Like the stars on the evening sky
Through the universe and centuries
They are calling, hear them callingLuminous, moonshine
Is guiding my travel through life
Through the winds of time
I hear angels calling, hear them callingNo tree has branches so foolish
As to fight among themselves
We share the same biology
We are one, we are luminousLuminous, when we die
We return to the great ocean
Of the living energy
It is calling, hear it callingLuminous, my life
A breath in the cosmic play
Without reason or rhyme
It is calling, hear it callingNo tree has branches so foolish
As to fight among themselves
We share the same biology
We are one, we are luminousLuminous
Luminous
Luminous
