

Something Happens when You Touch Me

Colin Blunstone

I often wondered if the time would come
When I would feel settled with somebody
It's really hard to be alone
When you're not sure who you wanna be
And then I found I'd ran aground
No longer could I hang around with nobody
But when we sat side by side
I knew that I'd never tried
You took me out of the crowd
I just wanna shout out loud Something happens when you touch me
Something happens when you touch me
Something happens when you touch me there Many times I told myself
You're sitting here left on the shelf
All by yourself
And nobody gets younger now days
Living good is something that we all know pays
I've faced an empty life ahead
Buth then I've found you instead
To show the way
And when you took hold of my hand
I knew I couldn't understand
It's not my fault that we fell down
You make my head go round and round Something happens when you touch me
Something happens when you touch me
Something happens when you touch me there I don't know what you've got
But you sure got a lot
More than enough for me
See me today and all days
I want you now and always
Just say the word and I'll drop everything
Everything oh la la Something happens when you touch me
Something happens when you touch me
Something happens when you touch me there
Ooh la la ... When you took hold of my hand
I knew I could never understand
It's not my fault that we fell down
You make my head go round and round Something happens when you touch me
Something happens when you touch me
Somehting happens when you touch me there

Something happens when you touch me
Something happens when you touch me
Something happens when you touch me there
