Levitation

Fallujah

In the darkness I will shine
Cast no shadows or define
Walk on water, float on air
There is no other to compareI have this fascination, no cause for deviation
It's called levitation, levitation, levitationThere's no cause to start and scream
Nor rub your eyes, this is no dream
Although I sit upon this chair
I rise and float up in the airI have this fascination, no cause for deviation
It's called levitation, levitation, levitationMagnetic force, repel, attract
Once it starts, there's no turning back
I offer you this chance to learn
Take it now, there's no returnI have this fascination, no cause for deviation
It's called levitation, levitation, levitationMagnetic force, repel, attract
Once it starts, there's no turning back
I offer you a chance to learn
Take it now, there's no returnI have this fascination, no cause for deviation
It's called levitation, levitation, levitation
