Another Way Out

Hollywood Undead

I wish there was another way out!
Voices won't go away
They stay for days and days
They say some awful things
Ways to make you fade away
I don't think no one's home
And we're just here alone
I better find you first, before you find the phone
You better run, better run, better run
Yeah, I'm coming after you when you sleep, in the night
Yeah, there's nothing you can do
There's no place you can hide 'cause I'm coming after you
I wish there was another way out for you
I wish there was another way out for you
I wish there was another way out!
I wish there was another way out!
I wish there was another way out!
You go up, check and see
No one cares less than me
Dead wrong, I guess you'll be
These voices won't let you leave

Got you down on bending knee
What should be my next weapon be?
It's over, you can't breathe
Just sit down, rest with me
You better run, better run, better run
Yeah, I'm coming after you when you sleep, in the night
Yeah, there's nothing you can do
There's no place you can hide 'cause I'm coming after you
I wish there was another way out for you
I wish there was another way out for you
I wish there was another way out!
I wish there was another way out!
I wish there was another way out!
Break you down, now put it back together again
I'll break you down, now put it back together again
Break you down, now put it back together again
I'll break you down, now put it back together again

I wish there was another way out!
I wish there was another way out!
I wish there was another way out!
I wish there was another way out!
