

# to the stars

## Ben Pleasance

Now that you've gone to the stars  
Now that the storm has finally come  
So now that you've gone to the stars  
Now that the storm has finally come  
When these colors fade to gray,  
You're a million miles away.  
When these colors fade to gray,  
You're a million miles away.  
When these colors fade to gray,  
You're a million miles away.  
When these colors fade to gray...  
Now that you've gone to the stars  
Now that the storm has finally come  
So now that you've gone to the stars  
Now that the storm has finally come  
So now that you've gone to the stars  
Now that the storm has finally come  
When these colors fade to gray,  
You're a million miles away.  
When these colors fade to gray,  
You're a million miles away.  
When these colors fade to gray,  
You're a million miles away.  
When these colors fade to gray...  
So now that you've gone to the stars  
Now that the storm has finally come  
So now that you've gone to the stars  
Now that the storm has finally come  
Now that you've gone...
