I Knew

Slick Shoes

I won't forget those summer days hangin' out with you
Not a care in the whole world
The nervous tension wouldn't keep me from your side
I knew that this time, I had to get it just rightI saw you and I knew, that you were the one for me
I saw you and I knew
On that windy winter night, I held you in my arms
The look in your eyes took the words right from my mouthI could barely speak, my stomach all in knots
Too many butterflies swallowed that night
I saw you and I knew, that you were the one for me
I saw you and I knewYou saw right through me
You leaned in and said those words
And I saw you and I knew, that you were the one for me
I saw you and I knew
