# So They Say

## Soundtrack

They put it in a can
Everybody needs or wants to join a band
And they play and they play, and they play
Drink more, you used it well
A million people playing at your tabloid hell
You okay, you okay, you okay, you okay?
'Cause Knoxville's doing all your stunts
And time is running out for love, yeah, yeah, yeah
You and me gonna set the world on fire
The president has proved himself to be a lie
So they say, so they say, so they say
So they say, so they say, so they say
Maybe just a little more to get me high
Its clear to everybody that the girl's got style
So they say, so they say, so they say
Watched night, the Percocet
Buy it in in bulk over the internet
So they say, so they say, so they say
So grow down and rule the world
Sitting on your face with meeting random girls
It's okay, it's okay, it's okay, it's okay
Your stone heart needs a little shove
And time is running out for love, yeah, yeah, yeah
You and me gonna set the world on fire
The president has proved himself to be a lie
So they say, so they say, so they say
So they say, so they say, so they say
Maybe just a little more to get me high
Its clear to everybody that the girl's got style
So they say, so they say, so they say, so they say
Your stone heart needs a little shove
Is that Green Peace picking through your junk?
Yeah, yeah, yeah
You and me gonna set the world on fire
The president has proved himself to be a lie
So they say, so they say, so they say
So they say, so they say, so they say
Maybe just a little more to get me high
Its clear to everybody that the girl's got style

So they say, so they say, so they say, so they say
