

Why Can't She Be You

Hank Cochran

I take her to the places you and I used to go
She tells me over and over that she loves me so
She gives me love like I never got from you
She loves me too her love is true why can't she be you
A day don't go that she don't show me I'm on her mind
And I'm lucky to have such a girl I hear it all the time
Se does all the things that you would never do
She loves me too her love is true why can't she be you
But she's not the one who dominates my mind and soul
And I should love her so cause she loves me I know but her kisses leave me cold
She takes my flowers calls on
the hour to prove her love
And my friends say when she's around I'm all she speaks of
She does all the things that you would never do
She loves me too her love is true why can't she be you
