# The Omega Man

## Cathedral

I'm sitting here alone in this waxwork palace
I stare at the motionless man with the eyes of Judas
It's a face I've seen before in a distant mental war
Who am I? Where have I come from?I am Frankenstein, one million years B.C.
Dinosaurs rule the earth all for you to seeMuseum of mankind distilled in ghostly silence
This orb no longer turns as if it never happened
My laboratory has closed a scientist with all the answers
But where am I? Where do I belong?I am Frankenstein, one million years D.C.
Machines now rule the earth not for you to see
