

# Listen to the Radio

## Lee Kernaghan

I'm counting the miles as they roll along  
I'm scanning the dial for an old familiar song  
To pass the time  
Fueled up out of narrow bride I'll survive the steps  
Working through the night  
I'm just head lights passing by  
Listen to the radio  
A melody we use to know  
Remember how it was back then  
Every word rang true  
Till all the stars fell from the sky  
I swore forever you and I  
The song could take you back in time  
I'd still be leaving you With every mile the signal fades  
I'd turn it up, so it want slip away  
Like you and me  
Semis on the interstates  
Ruby tail lights pass and float away  
Like a memory  
Listen to the radio  
A melody we use to know  
Remember how it was back then And every word rang true  
Till all the stars fell from the sky  
I swore forever you and I  
The song could take you back in time  
I'd still be leaving you Yeah listen to the radio If a song could take you back in time  
I'd still be leaving you  
Ah mmmmm
