

# Always on My Mind

William Marks

I've been lost on these endless streets such a long, long way from home  
While you're stuck in an empty room as you wait for me to show

    You are always on my mind  
    You are always on my mind  
    Always on my mind

When i sleep every dream is you filling up this empty bed

I awake to the sound of your voice but it's only in my head

    You are always on my mind  
    You are always on my mind  
    Always on my mind

    I always thought i could make it  
    Alone but you make it so hard to leave
