

# New Kingdom

## Venturia

You were the only one to feel inadequate  
Had lost your self-confidence, your inner cadence  
Felt so down inside, desintegrated, annihilated  
Had to find again that crazy strenght  
That was your own  
...One step closer to that place...

Touch your new kingdom  
Eyes wide open you will  
Face your new kingdom  
It's time to start again  
• Take the chance and truly believe...•  
Touch your new kingdom  
And save me from my sins

Why don't you capture this force, and deny the sorrow  
Take the opportunity to break the chains of your ghetto  
Time has come to spit the mud out of your mouth  
Don't you wait now, don't even ask yourself twice  
...One step closer to that place...

Touch your new kingdom  
Eyes wide open you will  
Face your new kingdom  
It's time to start again  
• Take the chance and truly believe...•  
Touch your new kingdom  
And save me from my sins

Stay, and wish for a new disguise  
Stay when you think you're losing your mind  
Tell me again your feelings keep growing stronger  
Now is the time to hold on tight  
Leave behind the days when you used to pretend  
• cos leaving is what you've got to do,  
Now and forever, until the end...

Gone is the misery  
Recaptured the intensity  
Free yourself so your mind will once again be

Electric,dynamic,ecstatic,psychedelic  
Welcome!Enjoy at last that third dimension  
~cos the world you™ve created is now...  
...Your new kingdom...

Touch your new kingdom  
Eyes wide open you will  
Face your new kingdom  
It™s time to start again  
œTake the chance and truly believe...œ•  
Touch your new kingdom  
And save me from my sins
