

# Big Wheels In The Moonlight

Dan Seals

I came from a town that was so small you look both ways and you could see it all  
All I wanted was some way out every evening I'd slip into town  
And stand around by the caution light and watch the big trucks rolling by  
For me it was a beautiful sight big wheels in the moonlightI had a case of wanderlust I'd lie awake with the windows up  
Out on highway fifty-nine I could hear some big old diesel whine  
She was going through all the gears headed out to who knows where  
I fell asleep most every night dreaming about big wheels in the moonlightAnd I want to put my life on the centerline  
And I want to see the world before I die  
And I know that there's a peace I'll never find  
'Cause those big old wheels keep rolling through my mindHow I got here it's hard to say so many things got in my way  
Can't complain about all I've got kids and a wife and a regular job  
But at night when I'm setting here all alone in a living room chair  
Sometimes I close my eyes and see big wheels in the moonlightAnd I want to put my life on the centerline  
And I want to see the world before I die  
And I know that there's a peace I'll never find  
'Cause those big old wheels keep rolling through my mindAnd I want to put my life on the centerline  
And I want to see the world before I die  
And I know that there's a peace I'll never find  
'Cause those big old wheels keep rolling through my mind'Cause those big old wheels keep rolling through my mind
