# One Promise

## The Birthday Massacre

Watching at the window
The room has been dark since yesterday
Making sure the door's locked
Making sure the toys are put awayI know a secret
You disappear without a sound
Tie it up and tear it downI try to remember our time together
One promise ruined everything
I never noticed the way you look at me
One deception you can't keep from meWatching from the back seat
Waiting for the light to disappear
I wonder where the night went
Looking down the road that led us hereI used to know you
But that was in another life
And I can't wait another nightDo you remember last December?
One promise ruin everything
I never noticed dying in a dream
One deception you can't keep from meI try to remember our time together
One promise ruined everything
I never noticed the way you look at me
One deception you can't keep from me
