

The Future Song

[Vanessa Paradis](#)

Life brings on unexpected changes
But we must carry on despite it
Are we gonna try, are we gonna make it Why is love so very hard, why is peace so very far
I can't make it The future of our space and time
Is not gonna wither and die The future of our space and time
Is not gonna say, goodbye We can't control all our situations
And we can't console underprivileged nations
So why don't we try to make more smiling faces We're so full of disregard, we feel pain within our hearts
I can't take it The future of our space and time
Is not gonna wither and die The future of our space and time
Is not gonna say, goodbye So I'm calling out, out to all the races
We can't gain control without communication
And we need to learn for future generations There is future in our stars, there is beauty that is ours
We're gonna make it The future of our space and time
Is not gonna wither and die The future of our space and time
Is not gonna say, goodbye The future of our space and time
Is not gonna say, goodbye
