

Dissolve and Decay

Hawthorne Heights

She wore crushed velvet
Jet black and to the floor
She rode on angel's wings
That used to shine, oh so bright
Now the dark has caught the spark
In her eyes and I
I can't find the air
I'll wait for you, I cross my heart
Dissolve and decay
There's nothing left for me
(Right now) Walk slowly towards the light
She's calling and I'm falling down
She's crying and I am lying about last night
She can't find a way to tell me, I can't find the air
I'll wait for you, I cross my heart
Dissolve and decay
There's nothing left for me
(Right now) This fire's dying down
There's nothing left to take
(Right now) (Right now)
Dissolve and decay
There's nothing left for me
Sit back and let her die slowly
Don't cry, she didn't love you anyway
Dissolve and decay
There's nothing left for me
Just try to make it out alive, yeah
Alive means your blood is flowing (Now, right now)
Dissolve and decay
There's nothing left for me
(Right now) This fire's dying down
There's nothing left to take
(Right now)
