

# Clair De Lune

## ...And You Will Know Us by the Trail of Dead

Well the mood settled down  
Once the movie hit town  
You know all the movies I've seen  
You never did understand  
How I watched all of them  
Can't figure how you never did Well the moon is so gold  
That it conquers the soul  
Like that very first moment we kissed  
But you never will go far  
In a Japanese car  
Just thinking of the things that we've missed What good are promises  
If nobody honors them? And so we never ask 'why?'  
Don't say anything nice  
And don't talk if we meet on the field  
Because I want you to know  
That I let it all go  
Even if you never did.
