Softest Place On Earth

Xscape

Baby
Well well wellIt's a glowing little feeling
Like a summer sun that slowly rises
On a new horizon of love
And it's more exotic than Jamaica
Or the rain that falls in Costa Rica
Like a waterfall to the sea
So tell me babyDo you wanna fly, I can take you high
Come ride on these midnight skies
If you're looking for Heaven's only door
You've got the key baby open meBaby, won't you come inside
I'll take you on a fantasy ride
Take a journey through my universe
My love's the softest place on earth
You don't have to pull the blinds
Let the neighbors lose their minds
Baby, you can be the first
Inside the softest place on earthOverflowing with emotion
I can will you feel so sensual
When I touch you, you will lose all control
Come on baby, kiss me all over
From my mountains to my valley low
There's an ocean of love just for you
Just for youDo you wanna fly, I can take you high
Come ride on these midnight skies
If you're looking for Heaven's only door
You've got the key baby open meBaby, won't you come inside
I'll take you on a fantasy ride
Take a journey through my universe
My love's the softest place on earth
You don't have to pull the blinds
Let the neighbors lose their minds
Baby, you can be the first
Inside the softest place on earthSo no more dreaming, your body's steaming
You want it baby, this is your night
I keep arising, I'm fantasizing
I want it so bad I'll do what you like
We can do it in the movies or in my jacuzzi
Or maybe Central Park

So if there's any doubt to what I'm all about
So tell your friends I'm turning you outBaby, won't you come inside
I'll take you on a fantasy ride
Take a journey through my universe
My love's the softest place on earth
You don't have to pull the blinds
Let the neighbors lose their minds
Baby, you can be the first
Inside the softest place on earthBaby, won't you come inside
I'll take you on a fantasy ride
Take a journey through my universe
My love's the softest place on earth
You don't have to pull the blinds
Let the neighbors lose their minds
Baby, you can be the first
Inside the softest place on earth
