

Silent Scream

Project Pitchfork

Advisory - the following lyrics contain explicit language:

Blocked mind
You can't go through, miss
Manipulated move
I can't handle this Controlled dreams
The real one
Never comes true
Passive eyes
They never will see through Silent screams
Causing no reaction The maggot is waving with the cross
Living in his own world
He thinks he is the boss Celebrating rituals
He'll never understand
And the worst thing is
The world lies in his hands
God is dying in mother's womb
So trust your own instinct Stop the holy bomb Constructed ways
Built up for us
You feel the comfort
You spend them your trust Decisions about
Things you can't know
Will made by them Controlled dreams
The real one
Never comes true
Passive eyes
They never will see through
So spit on this lie
And find your own aim
