

Take the Controls

Bonsai Nation

Ten years old
We moved away and there you go
The first fork in the road
Goodbye, hello

Wary world
Let me finish one last thought of mine
Then you can have the controls
Goodbye, hello

The well's gone dry
I want to stay but I might die
And it's a hundred and five
You know I'm trying to try

Victory is mine
If I could break my chains then I'll be fine
We're at fault by design
Hello, goodbye

I won't be here for long
It's not my fault humans are flawed
We're here and we're gone
The rest I'm not counting on
