

The Chemicals Between Us

Bush

I want you to remember
A love so full it could send us all ways
I want you to surrender
All my feelings rose today
And I want you to remain
The power of children can amaze
I'll try not to complain
I know that's a pisser baby
The chemicals between us
The walls that lie between us
Lying in this bed
The chemicals displaced
There is no lonelier state
Lying in this bed
I want you to remember
Everything you said
Every driven word
Like a hammer, hell, to my head
The chemicals between us
The walls that lie between us
Lying in this bed
The chemicals displaced
There is no lonelier face

Lying in this bed
The chemicals between us
The chemicals between us
Lying in this bed
We're on the hollow bend
We are the naked ones
We never meant you harm
Never meant you wrong
And I'd like to thank
All of my lovers, lovers, lovers
Lovers, lovers, lovers
The chemicals between us
Army of achievers
Lying in this bed
The chemicals displaced

There is no lonelier state
Lying in this bed
The chemicals between us
The chemicals between us
The chemicals
The chemicals between us
