

Doomed by the Living Dead

Mercyful Fate

I'm back again, back in the evil night, and you're waiting
Doomed by the living dead, flames are rising, can't you see you're dying

•The wolves are howlin', a baby's cry in the distance, cold winds
blowing

in the dead of night, flames are rising, can't you see you're dying
No way to survive this evil night, if the dead won't leave you alone

So just say goodbye to all your holy angels, you're gonna die

Long black hair, face like a dead, I am here, Satan in my head

You can't see nothing but confusing mirrors, now you feel it

It's getting nearer, flames are rising, can't you see you're dying

So dark in your mind, breath of Satan in my back, I can't help you
cause I'm one of the dead, flames are rising, can't you see you're dying

No way to survive this evil night, if the dead won't leave you alone

So just say goodbye to all your fuckin' angels.
