

Lay It On the Line

[Joe Modifica](#)

Hey Mister - standing there
Listen carefully - what do you hear?
Tides are rising - tears we share
Stormy weather = everywhereHey Sister - look over there
Our oceans and forest - they need our care
From eagles to whales - everything between
We can't fail - or turn from the sceneSeems so hard - all alone
What do you do - who do you phone
The task is hard - the end seems far
One small step - you move the markLay it on the line - the world you make, you'll find
Lay it on the line - getting it right this time
Lay it on - lay it on - the lineLay it on the line - the world you make, you'll find
Lay it on the line - make up your mind
Lay it on - lay it on - the lineHey people - don't just sit tight
Now is the time - for all to unite
The world is waiting what do you see
A world is ruins - or world that still dreamsHey people - don't just sit tight
Now is the time - for all to unite
The world is waiting what will the future bring
A world is ruins - or world that still dreams
