

Indiana (Live Acoustic)

The Samples

I remember the first time I drove through Indiana
Watching fences in the distance fade away
Once there was a girl I knew there and she was pretty
We kept in touch until we just went our own ways I remember the first time I drove through Indiana
Waving goodbye to the towns that we drove through
Far away I know they're deep inside a city
Rushing back and forth wanting only to get home
Once I was there in a dream meeting people
Without names and without faces they live I remember the first time I drove through Indiana
I remember the first time I drove through Indiana I remember the first time I drove through Indiana
Watching semis hauling grain to the West
We're gonna make it all the way to Colorado
Where the mountains touch the sky and rivers bend I remember the first time I drove through Indiana
Thinking to myself how big this land really is
Amber waves of grain from a highway
Who lives in that house so far away? I remember the first time I drove through Indiana
Watching fences in the distance fade away I remember the first time I drove through Indiana
I remember the first time I drove through Indiana
I remember the first time I drove through Indiana
